

# Has Multiple Sclerosis affected you or someone you care for?

Join us for a free and interactive educational program delivered by a leading MS specialist.

AMPYRA® (dalfampridine) Extended Release Tablets, 10 mg is indicated as a treatment to improve walking in patients with Multiple Sclerosis (MS). This was demonstrated by an increase in walking speed.

Presented by Cindy Mather, PT  
Mercy Riverside

Café Baratta's At The State Historical Museum  
600 Locust Street, Des Moines, IA 50319

Friday, February 15, 2013  
12:00 PM
